

Distal project

The basic reason for this small project was to test to extreme one single SiSiC ceramic VR-unit for the SolAir project and so to speak speed up the base of experience and hereby improve the products otherwise delivered to the SolAir project.

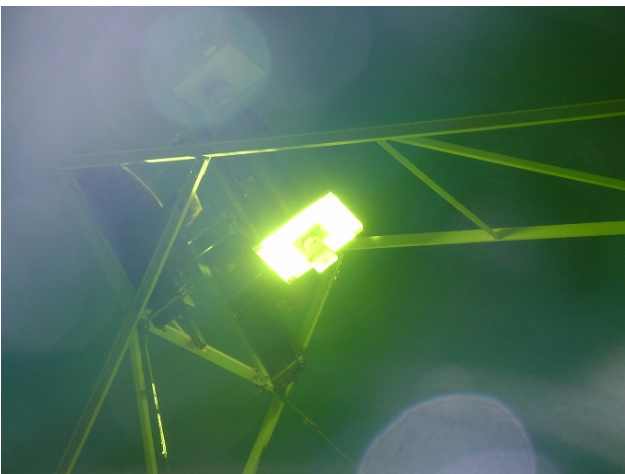

Partners:

- Stobbe Tech, Denmark – www.stobbe.com
- Centro de Investigaciones Energéticas Medioambientales y Tecnológicas (Ciemat) - including availability of solar test beds on the Plataforma Solar de Almeria in South-Spain - www.ciemat.es

Title: Testing new advanced ceramics for volumetric receivers

Distal research project sponsored by the EU commission under the program Improved Human Potential / IHP under EC-DGXII which offered access to the PSA facilities for year 2001.

Project period: year 2001 and 2002 campaign at PSA
